

# Protect yourself from Rat Lungworm Disease

Disrupt the life cycle of the rat lungworm parasite by using a slug jug to collect snails and slugs on your property. Never touch slugs and snails with your bare hands. Always use tongs/chopsticks.

## Make a slug jug:

### Supplies needed:

- Large, wide mouth plastic container
- Tongs/chopsticks
- Salt
- Water

### Directions:

1. Fill jug with 6 parts water and 1 part salt
2. Use tongs to collect slugs, snails, flatworms
3. When jug is full dump out on weeds, gravel, pavement.
4. Refill with salt water solution
